POLYOLEFIN FILM COMPOSITIONS WITH PERMANENT ANTIFOG PROPERTIES

Abstract of the Disclosure

Polyolefin films having incorporated therein a compound of the formula $CH_3CH_2(CH_2CH_2)_aCH_2CH_2(OCH_2CH_2)_bOH, \ where \ a is 9 to 25 \ and \ b is 1 to 10, \ exhibit superior long lasting fog resistance. The polyolefin films are useful as packaging film for moist products and as a greenhouse film for agricultural applications.$
